-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19 and 33-52, drawn to a product, classified in class 428, subclass 100.
- II. Claims 20-32, drawn to a process, classified in class 264.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process such as by extruding the base portion and hook portions separately and attaching them together with adhesive.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Bond on September 15, 2004 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-19 and 33-52. Affirmation of this election must be made by applicant in replying to this Office action. Claims 20-32 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 1772

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Objections

6. Claim 48 is objected to because of the following informalities: the dependency of this claim is incorrect. Appropriate correction is required.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1, 2, 5, 6, 8, 15, 17, 33-35, 38, 39, 41 and 48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by 3,922,455. See Figures 1 and 18, column 3, lines 3-7, column 5, lines 42-51, column 8, lines 18-25 and column 6, lines 41-46.

9. Claims 1, 2, 5, 6, 8-10 and 17 rejected under 35 U.S.C. 102(b) as being clearly anticipated by 3,991,534. See Figure 4 and column 3, lines 16-18.

Art Unit: 1772

10. Claims 1, 2, 5, 6, 8, 33, 35 and 39 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by 3,522,637. See Figure 7, and column 4, lines 1 and 23-28.

Claim Rejections - 35 USC § 103

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 3, 4, 7, 9-14, 16, 18-19, 36, 37, 40, 42-47 and 49-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over 3,922,455. The reference discloses the invention substantially as claimed; see Figures 1 and 18, column 3, lines 3-7, column 5, lines 42-51, column 8, lines 18-25 and column 6, lines 41-46. However, it does not disclose the claimed materials use to make the hook strand, the density of the hooks or the shape of the hooks and strand. It would have been obvious to one of ordinary skill in the art to vary the shape and materials used to form the hooks and strand of the article in the reference in order to provide the desired structural properties for a particular end use. It would also have been obvious to one of ordinary skill in the art to adjust the density of the hooks on the strand in order to provide the desired gripping power for a particular end use.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.
